2. Novelty

The claimed subject matter is concerned heterocyclic intermediates (claims 1-13), peptido-mimetic compounds, process to make it and its use (claims 16-36), use of heterocyclic intermediates to make peptido-mimetic compounds (claims 14-15).

2.1 heterocyclic intermediate and its use (claims 1-15)

Documents D1-D9 (see search report cited parts) anticipate the subject matter of claims 1-4,6,9-11,14,15 of this application.

The remaining subject matter when R3 is allyl, hydroxypropyl,hydroxyethyl and alkyl can be considered as novel.

2.2 peptido-mimetic compounds and use (claims 16-36)

Documents D1 (see p.4355, compound 1) and D2 (p.380, compounds 14b, 15b) anticipate the 16-19,22-36.

3. Inventive step

Document D1, which is considered to represent the most relevant state of the art, discloses (cf. see whole document and compound 1 on page 4355) a compound from which the subject-matter of claims 20 and 21 differs in that the substituent on position 3 of the azabicycloalkane is allyl, hydroxyethyl or hydroxypropyl instead of benzyl.

The problem to be solved by the present invention may therefore be regarded as to provide novel derivatives useful as inhibitors for angiogenesis.

The solution proposed in claims 20 and 21 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT) for the following reasons.

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/IB2004/002204

The skilled person knows from the teachings of D10 (no substituent on position 3) and of D1 that a substituent on position 3 of the azabicycloalkane does not influence the biological activity of the molecule, so the skilled man would expect that the compounds of subject matter of claims 20 and 21 to exert biological properties.

Concerning the intermediates to make the end product of claims 20 and 21, these cannot be considered as inventive since the end product themselves do not involve inventive step.

Re Item VII

Certain defects in the international application

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1-D9 is not mentioned in the description, nor are these documents identified therein.

Re Item VIII

Certain observations on the international application

In claim 1, the terms "substituted", "lower", "suitable protective group" should be defined. The same goes for claim 16.
